Distribution of Parameters for Generated SQL Queries on the TPC-H Database

```
## Scenario: 1-3jp_rjjp__g__h0-3ss_h0-3nss

## Scale factor: 5 GB

## The 1000-query pack was generated on: 2023-11-06

## First column ('Query parameter or value') displays either:

## - a parameter name, or

## - a value of the current parameter (only for low-cardinality parameters).

## Second column ('Descriptive statistics') displays:

## - for low cardinality parameters: frequency and proportion from total (of 1000 queries)

## - for higher cardinality parameters: [min, median, max] mean / SD
```
